Where to buy Aprezo (apremilast 30 mg)?

Selective immunosuppressant from the Indian pharmacological company Glenmark - Aprezo is intended for the treatment of psoriasis. The apremilast contained in the drug has an anti-inflammatory effect on cell mediators, which leads to a decrease in the activity of the disease and to a complete recovery. The pharmacy offers to buy Aprezo at an affordable price, consult your doctor before buying!

Price of Aprezo tablets (apremilast 30 mg)

The original drug based on apremilast was created by the Swiss pharmacological company Celgene International Sarl, an analogue of Indian production is made according to the same formula. Thus, Aprezo has the same composition and efficiency as the original, but costs several times cheaper. The low price of generic drugs is due to the peculiarities of taxation of pharmaceutical manufacturers in India, as well as the low cost of labor. Our pharmacy offers to get Aprezo at an affordable price directly from the manufacturer, without markups and additional payments.

Reviews about the drug Aprezo

In the course of clinical studies of the active substance apremilast, which is the basis of the drug Aprezo, its inhibitory effect on inflammatory mediators was revealed. Once in the patient's body, Aprezo selectively acts on the cells in the foci of inflammation, which leads to improvement

and recovery. Reviews of those who have already undergone treatment with Aprezo tablets note a small number of side effects and a high effectiveness of the drug.
