The price of the drug Azel (enzalutamide 40 mg)

Dr. Reddy's has received a license to manufacture an anticancer drug from the World Health Organization, which ensures the effectiveness of the drug in the fight against severe prostate cancer. The original drug - Xtandi tablets were added to the list of vital drugs only in 2018, which makes drugs containing enzalutamide as effective as possible in the fight against the disease. Thanks to agreements with the manufacturer Azel, the pharmacy offers the best price on the market without losing the quality of the drug, which allows you to immediately start treatment. The drug is delivered to our warehouses directly from the manufacturer, which guarantees the quality and safety of the drug.

Azel (Enzalutamide 40 mg) reviews

The manufacturer of the medicinal product is Dr. Reddy's, did not conduct clinical trials on Azel, however, the drug's active agent, enzalutamide, has been extensively studied. During the tests, a significant slowdown in the growth of tumors in the area of ??the prostate gland was revealed. In addition, patients taking the drug report positive dynamics in the course of treatment and a small number of side effects.

Description of the drug Azel (Enzalutamide 40 mg)

Azel tablets in the form of a cone-shaped white capsule contain 40 mg of the active substance enzalutamide, which acts on cancer cells, blocking their reproduction. The remains of the drug are excreted by the kidneys and intestines.

Indications and methods of application

Azel is used as an ingredient in the treatment of metastatic malignant neoplasms in the prostate gland. Oncologists usually prescribe a daily pill containing a dose of enzalutamide between meals. Exceptions are debilitated patients, patients with problems in the liver, cardiovascular system, pancreas or musculoskeletal system. In each case, the dosage can be reduced.

Contraindications

Azel tablets are not used to treat women, children and adolescents due to their effect on the body's hormonal system. Among the contraindications is also an individual intolerance to enzalutamide or other components of the drug. In case of muscle weakness, heart problems or seizures, you must stop taking the drug and immediately contact your oncologist.
