Where to Buy Palbocent (?albociclib 125mg)

To combat metastatic and locally advanced breast cancer, Bangladesh-based Incepta Pharmaceuticals Ltd has launched Palbocent. The drug has shown good results in reducing the size of malignant tumors and in the number of cases of remission. After consulting a doctor, you can buy Palbocent at a pharmacy that offers an affordable price and fast delivery.

Price for the drug Palbocent (palbociclib 125 mg)

The cost of the Palbocent drug in the online pharmacy is significantly lower due to the direct supply of the drug from the factory in Bangladesh, we have direct supply agreements with the manufacturing company Incepta Pharmaceuticals Ltd. The generic drug itself is distinguished by a low price due to the fact that the manufacturer does not need to conduct clinical trials, since they have already been carried out by the manufacturer of the original drug - Ibransa, which is produced by Pfizer. In addition, Palbocent does not need to carry out an advertising campaign, since the action of the main component - palbocyclib - is well known. All these and some other factors affect the cost of Palbocent, making it affordable for most patients.

Palbocent reviews (palbociclib 125mg)

Pfizer pharmacologists, conducting research prior to the release of the original Palbocent, Ibrance, found that palbociclib, which is the base of the drug, binds the multiplication system of cancer cells in the mammary glands, leading to a decrease in malignant growths. The modern formula influences the number of side effects, making taking Palbocent safe and less unpleasant than many other anticancer drugs.

Description of Palbocent

Palbocent packaging is a cardboard box with the manufacturer's branded holograms, inside which there is a blister with 21 doses of the medicine. Each dose contains 125 mg of palbociclib and additional components packed in gelatin capsules, making them easy to take orally.

Indications for use of Palbocent (palbociclib 125 mg)

Palbocent is prescribed for patients with metastatic and locally advanced breast cancer. The drug can be used as a monotherapy or as part of a treatment regimen, depending on the patient's condition and the appointment of the attending oncologist. According to the instructions, Palbocent is taken once a day, at the same time. Depending on the patient's condition, the dose of the medication can be changed.

Contraindications Palbocent

The drug is not intended for use by minors, men and those who have an individual intolerance to the components of the drug.

Order Palbocent (palbociclib 125 mg)

The pharmacy offers ordering Palbocent using a simple, intuitive form located on the drug page on the website. For prompt communication with a consultant, you can order a call back or write a message via the messenger. Any selected order form involves contacting our manager, who will help you complete the purchase.

Delivery Palbocent

Delivery of the drug Palbocent is carried out throughout Russia. Apteka will send the required amount of medicine through the Russian Post or using the international EMS service. Delivery times depend on the distance of the recipient.

Palbocent Payment (palbociclib 125 mg)
