Description

Basic informationDescriptionOrder, delivery and payment

Simanod is an antiviral agent designed to treat HIV-infected patients. This is the first Russian generic atazanavir. The manufacturer of the drug is Pharmasyntez JSC, the active ingredient is atazanavir (200 mg), the correct spelling is Simanod.

Buy the drug Simanod

Patients can make a purchase of the drug Simanod through the online store of our pharmacy.

The price of the drug Simanod

Since this is a Russian generic drug, its cost is minimal compared to foreign originals. We care about improving the health and quality of life of patients with HIV infection, therefore, working directly with the manufacturer, we set affordable prices.

Shimanod: reviews

Reviews of the drug Simanod are mostly positive. Patients notice an improvement in their well-being 2-3 weeks after the start of taking the drug. The main thing is to take it only as directed by the attending infectious disease doctor in accordance with the scheme established by him.

It is an azapeptide inhibitor of the HIV-1 protease that selectively affects the protein structure of the human immunodeficiency virus. The substance atazanavir prevents further reproduction and the development of infection.

Description of the drug Simanod

Release form - capsules with a solid consistency, white, with an orange lid. You need to take them, swallowing whole, without chewing, according to the scheme established by the attending physician.
