Where to buy Trustiva (Tenofovir + Efavirenz + Emtricitabine)?

Trustiv's triple antiretroviral drug is formulated using a combination of their tenofovir, efavirenz, and emtricitabine. Each substance is responsible for a different function during therapy. The medication is used only for adult patients who have been diagnosed with the human immunodeficiency virus. Order the medicine Trustiva on the portal of the online pharmacy. We work with the most renowned Indian generic suppliers. Do not forget that self-medication is unacceptable. Therefore, you should first of all consult with the doctor who monitors the course of your therapy.

Prices for the drug Trustiva

Trustiva is a direct generic drug of Atripla, which began production back in 2016 in the UK. Considering the fact that generics are always much more affordable in their cost than originals, Trustiva will be very profitable to purchase. Its price is due to the fact that in India they do not spend a lot of money to advertise their product, because the effectiveness of tenofovir, efavirenz and emtricitabine has long been proven in practice. Use the catalog of our website, where it will be very easy to find the necessary medicine. Then fill out the required application for your order. Trustiva is bought by all patients for whom Atripla seems to be a very expensive medication.

Active ingredients Tenofovir 300 mg, Efavirenz 600mg & Emtricitabine 200mg

The combination of tenofovir, efavirenz, and emtricitabine instantly cope with the arrest of human immunodeficiency virus cells. Substances block the growth of viral cells. During therapy with tenofovir, emtricitabine and efavirenz, side effects can sometimes occur: severe headache; feeling weak; upset gastrointestinal tract (vomiting, diarrhea, nausea); pain in the abdomen; insomnia; allergic itchy skin rashes. But it should be borne in mind that such effects are most often temporary. If they persist, in this case, you need to urgently consult your doctor.

Description of Trustiva

Trustiva medication is sold in its original packaging, which bears the manufacturer's logo. One box contains 30 film-coated capsules. One tablet is formulated with tenofovir 300mg, emtricitabine 200mg and efavirenz 600mg.
